visual sensation
based on psychology & biology

- Welcome to the Neodia exhibition, where Illusion, Color and Element will take you to an amazing world full of unique sounds and animations. Millions of colors and shades in 3D, digital illusion, combination of elements, jungle and many other attractions are waiting to give you unforgettable moments for all your senses. Neodia is an exhibition that will spark your imagination to the limit.

— Neodia City

Unique and breathtaking 3D videomapping show on miniatures of architectural monuments from Poland and around the world. The miniatures were prepared by our team of technicians and modelers in 3D printing technology. The exhibition presents the most interesting animations produced in the last 10 years by the precursors of videomapping in Poland - a group of artists, Clockwork, which has already produced nearly 100 such shows in its history, for which it has won many awards.

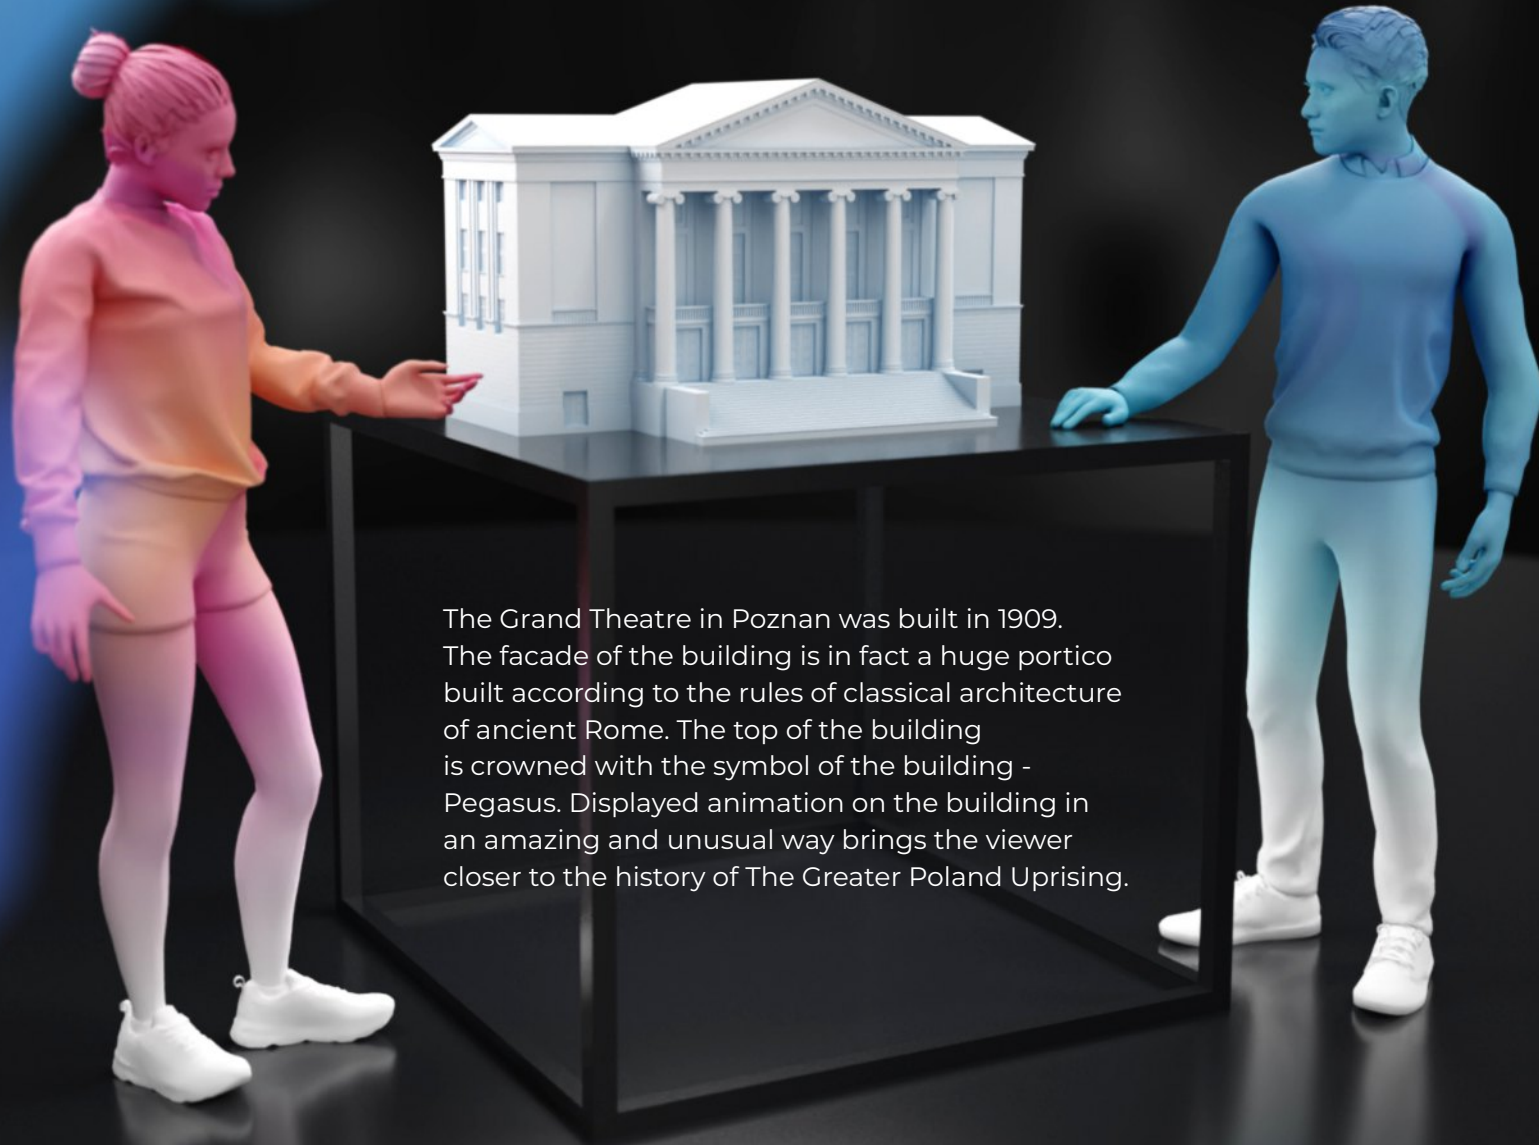

— Model - Lighthouse in Ustka

The historic Lighthouse in Ustka is a nearly 20 meters high structure built in 1892. Since 1993 it has been listed in the register of immovable monuments. 3D videomapping on the facade of the lighthouse in Ustka, displayed on the occasion of the first edition of the Festival of Lights. The concept and realization of abstract animations are the work of Clockwork art. collective.

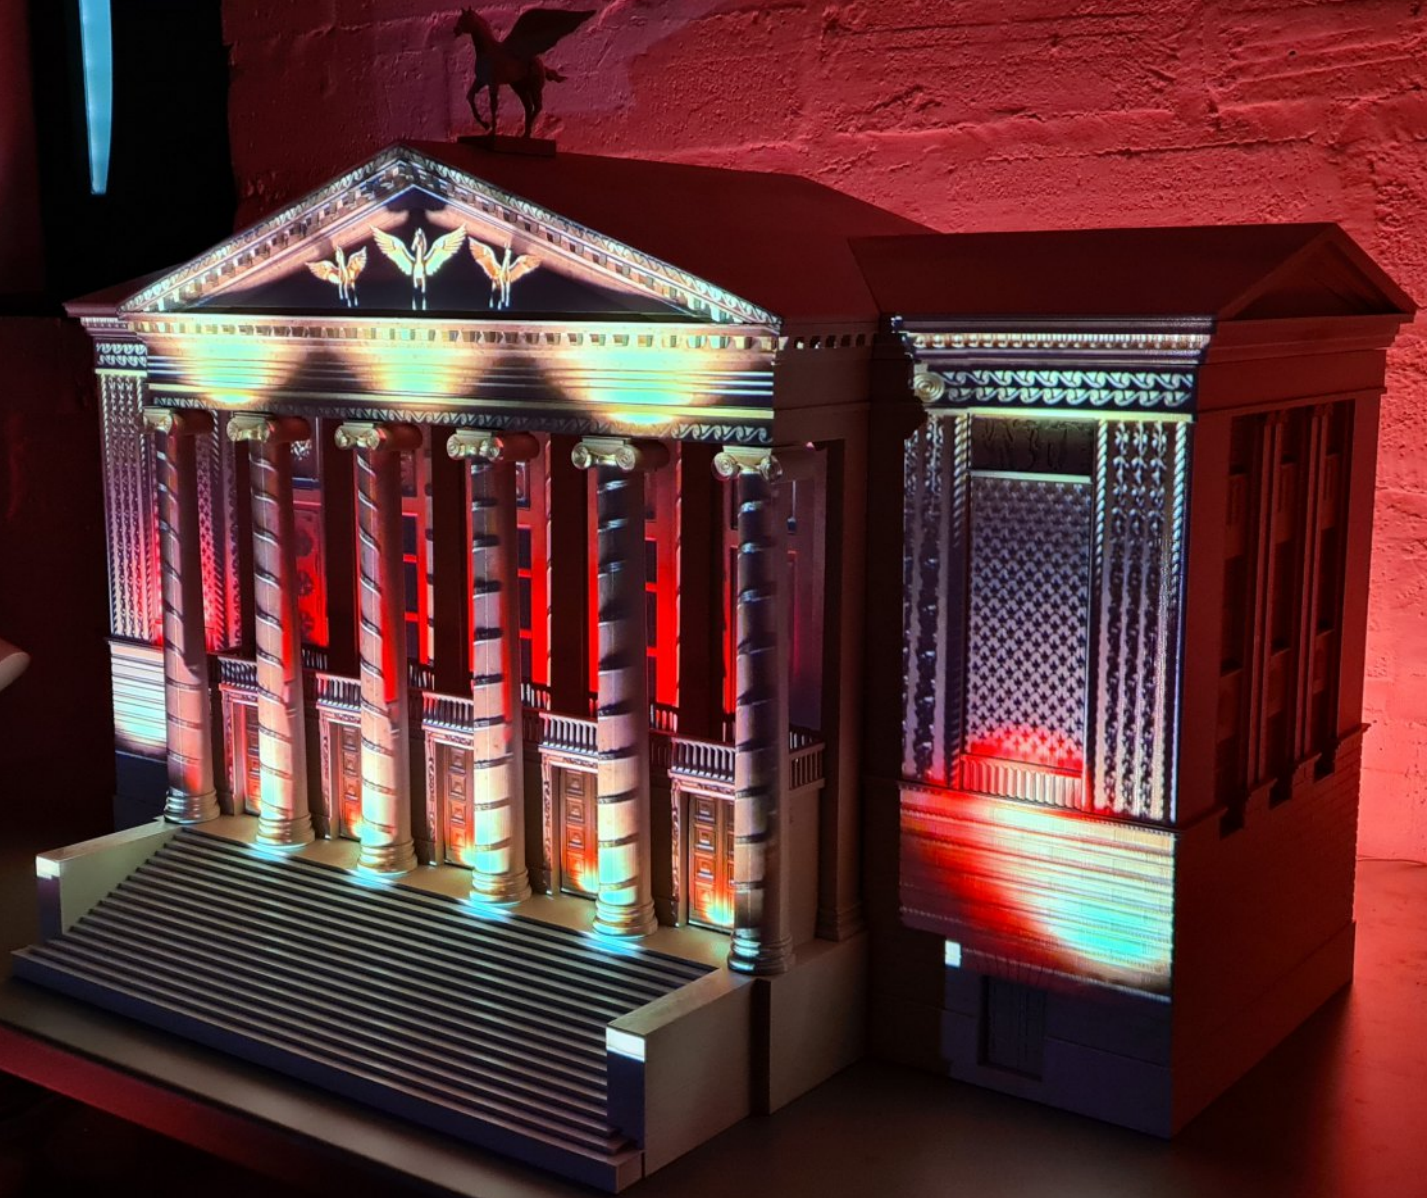

— Model - Grand Theatre in Poznań

The Grand Theatre in Poznan was built in 1909. The facade of the building is in fact a huge portico built according to the rules of classical architecture of ancient Rome. The top of the building is crowned with the symbol of the building - Pegasus. Displayed animation on the building in an amazing and unusual way brings the viewer closer to the history of The Greater Poland Uprising.

— Model - Brandenburg Gate in Berlin

The historic Brandenburg Gate in Berlin was built in 1791. It was destroyed in 1945 at the end of the Second World War. It was rebuilt in 1957 and remains one of the landmarks of the city. The building actually measures 26 m. high and 65.5 m. wide. The 3D Video Mapping was created for the Festival of Lights 2015 with the theme "Vision of Tomorrow". The animation conveys the idea of renewable energy sources in an attractive and entertaining way for the viewer.

— Model - Charlottenburg Palace in Berlin

The Charlottenburg Palace, is a palace and park complex in Berlin built in 1699. This animation was created as part of the Festival of Lights 2020.

— Model - Hevelianum - Artillery Carriage House in Gdańsk

Hevelianum is a science center located in Grad Mountain Fort in Gdańsk. Since 2018 this place combines the idea of a multidirectional complex of education and history, culture and recreation. The projection displayed on the facade of the full-size building brings us closer to the history of the fortifications, which form changed according to the development of technology.

— Model -The castle chapel of St. Thomas Becket in Racibórz
- Intro Festival

The historic castle chapel of St. Thomas Becket in Racibórz was founded in 1293. The building was destroyed by fires many times. In spite of that, it has survived to the present day, being a so called pearl of Silesian Gothic. The animations were created as a part of INTRO Festival - electronic music event, and they were a part of the visual setting.

— Model - Palace in Rokosowo

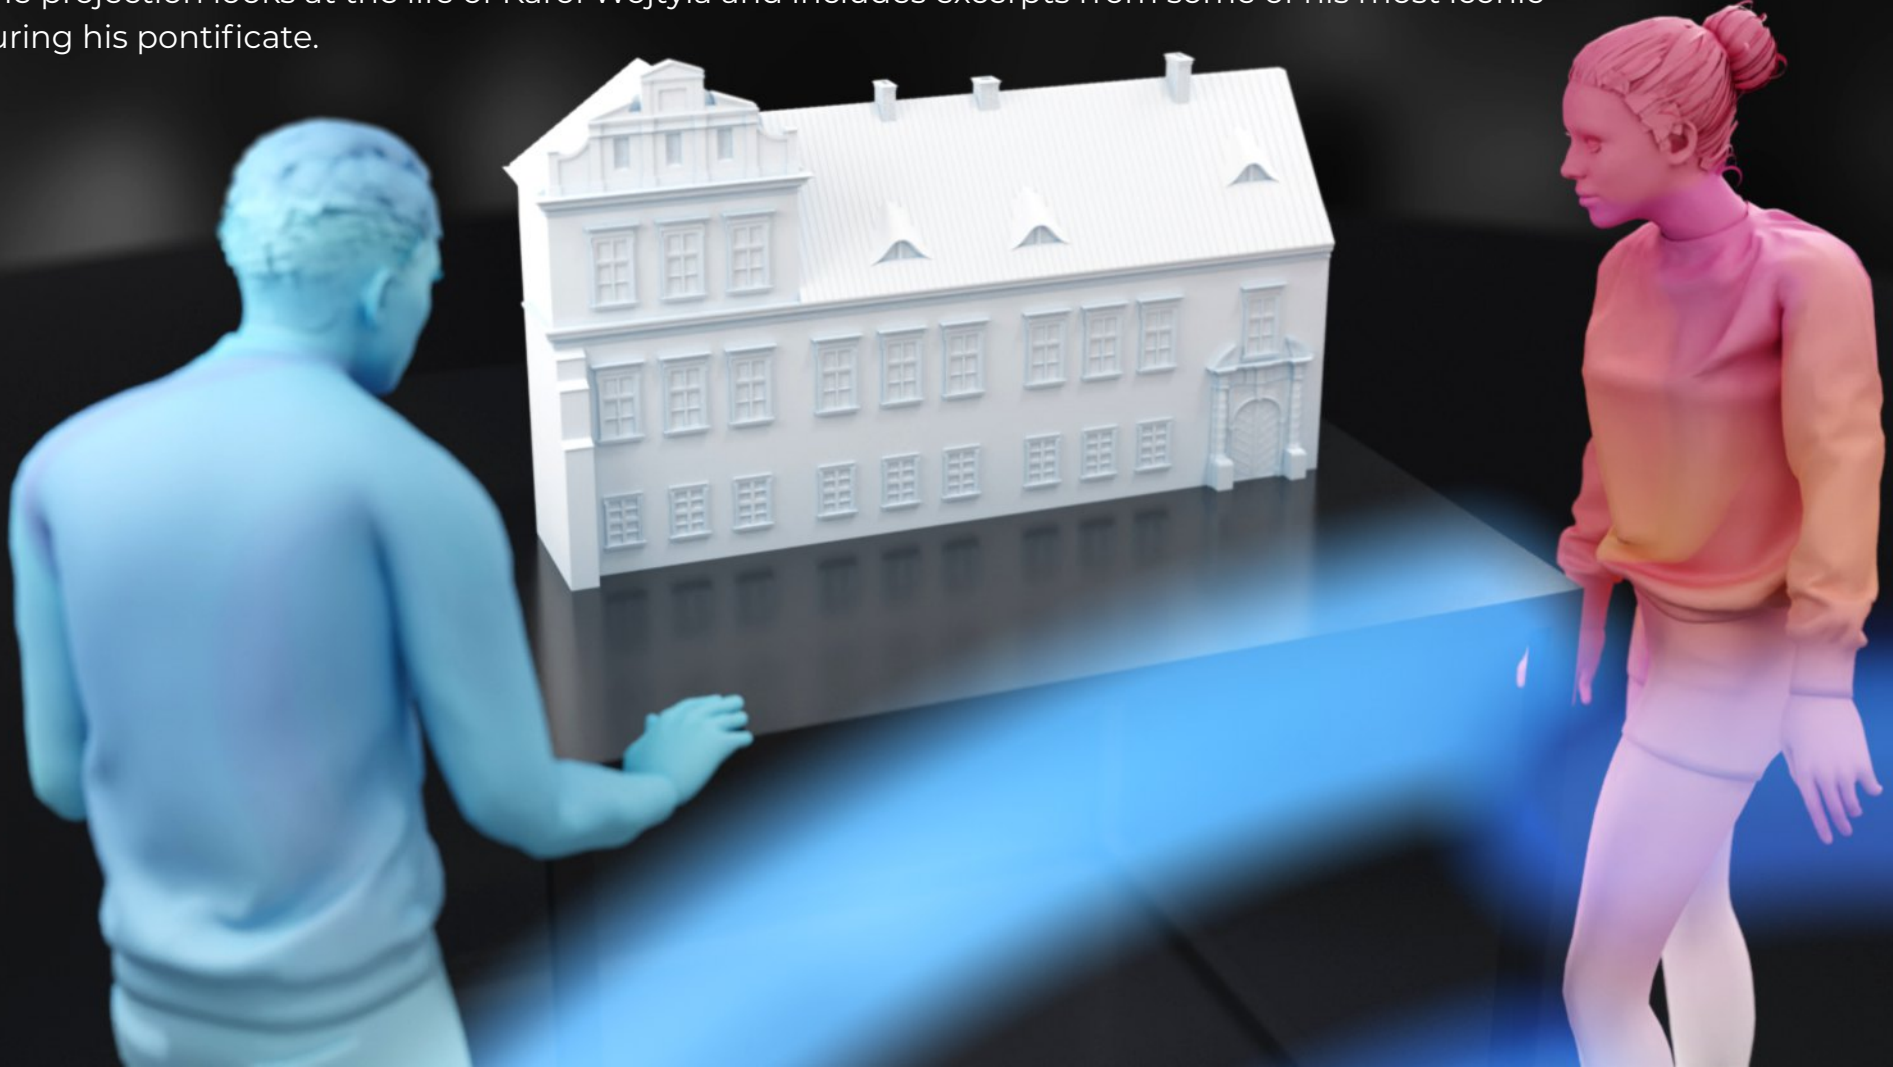

The palace in Rokosowo is a neo-Gothic building from the mid-19th century designed by architect Friedrich Stüller for count Józef Mycielski. At one time it was owned by members of the Czartoryski family. Currently it serves as the Center of European Integration and belongs to the Marshal's Office of The Greater Poland Region. The animation was prepared on the occasion of Filtron's jubilee. It does not lack mystery and interesting graphic arrangements.

— Model - The Bishop's Palace in Cracow

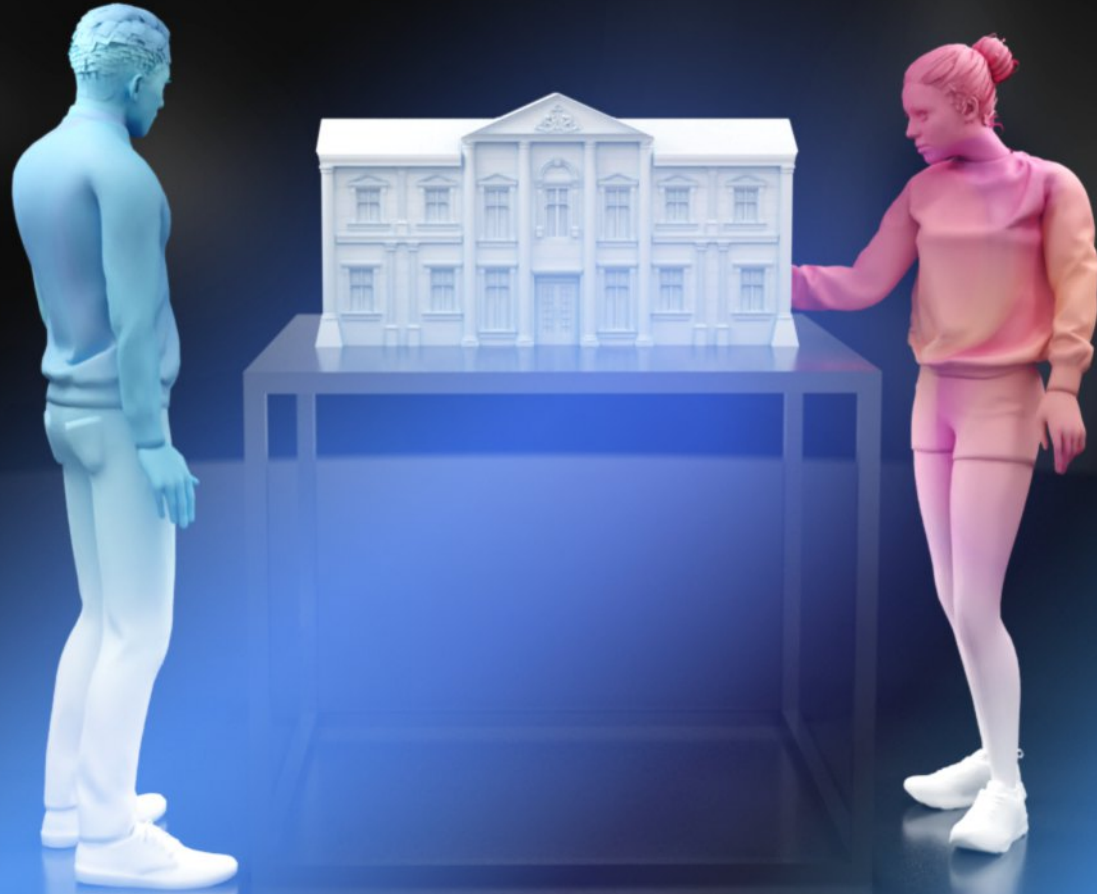

The Bishop's Palace located on Franciszkańska Street, Cracow, is a 19th century building with preserved fragments from the Renaissance and Baroque periods. This place has a special significance for Catholics because of the papal pilgrimages of John Paul II. During his visits, the Pope resided in the Palace and crowds of pilgrims would gather under his window. From this window John Paul II used to appeal to them during his unofficial speeches. The projection looks at the life of Karol Wojtyla and includes excerpts from some of his most iconic speeches during his pontificate.

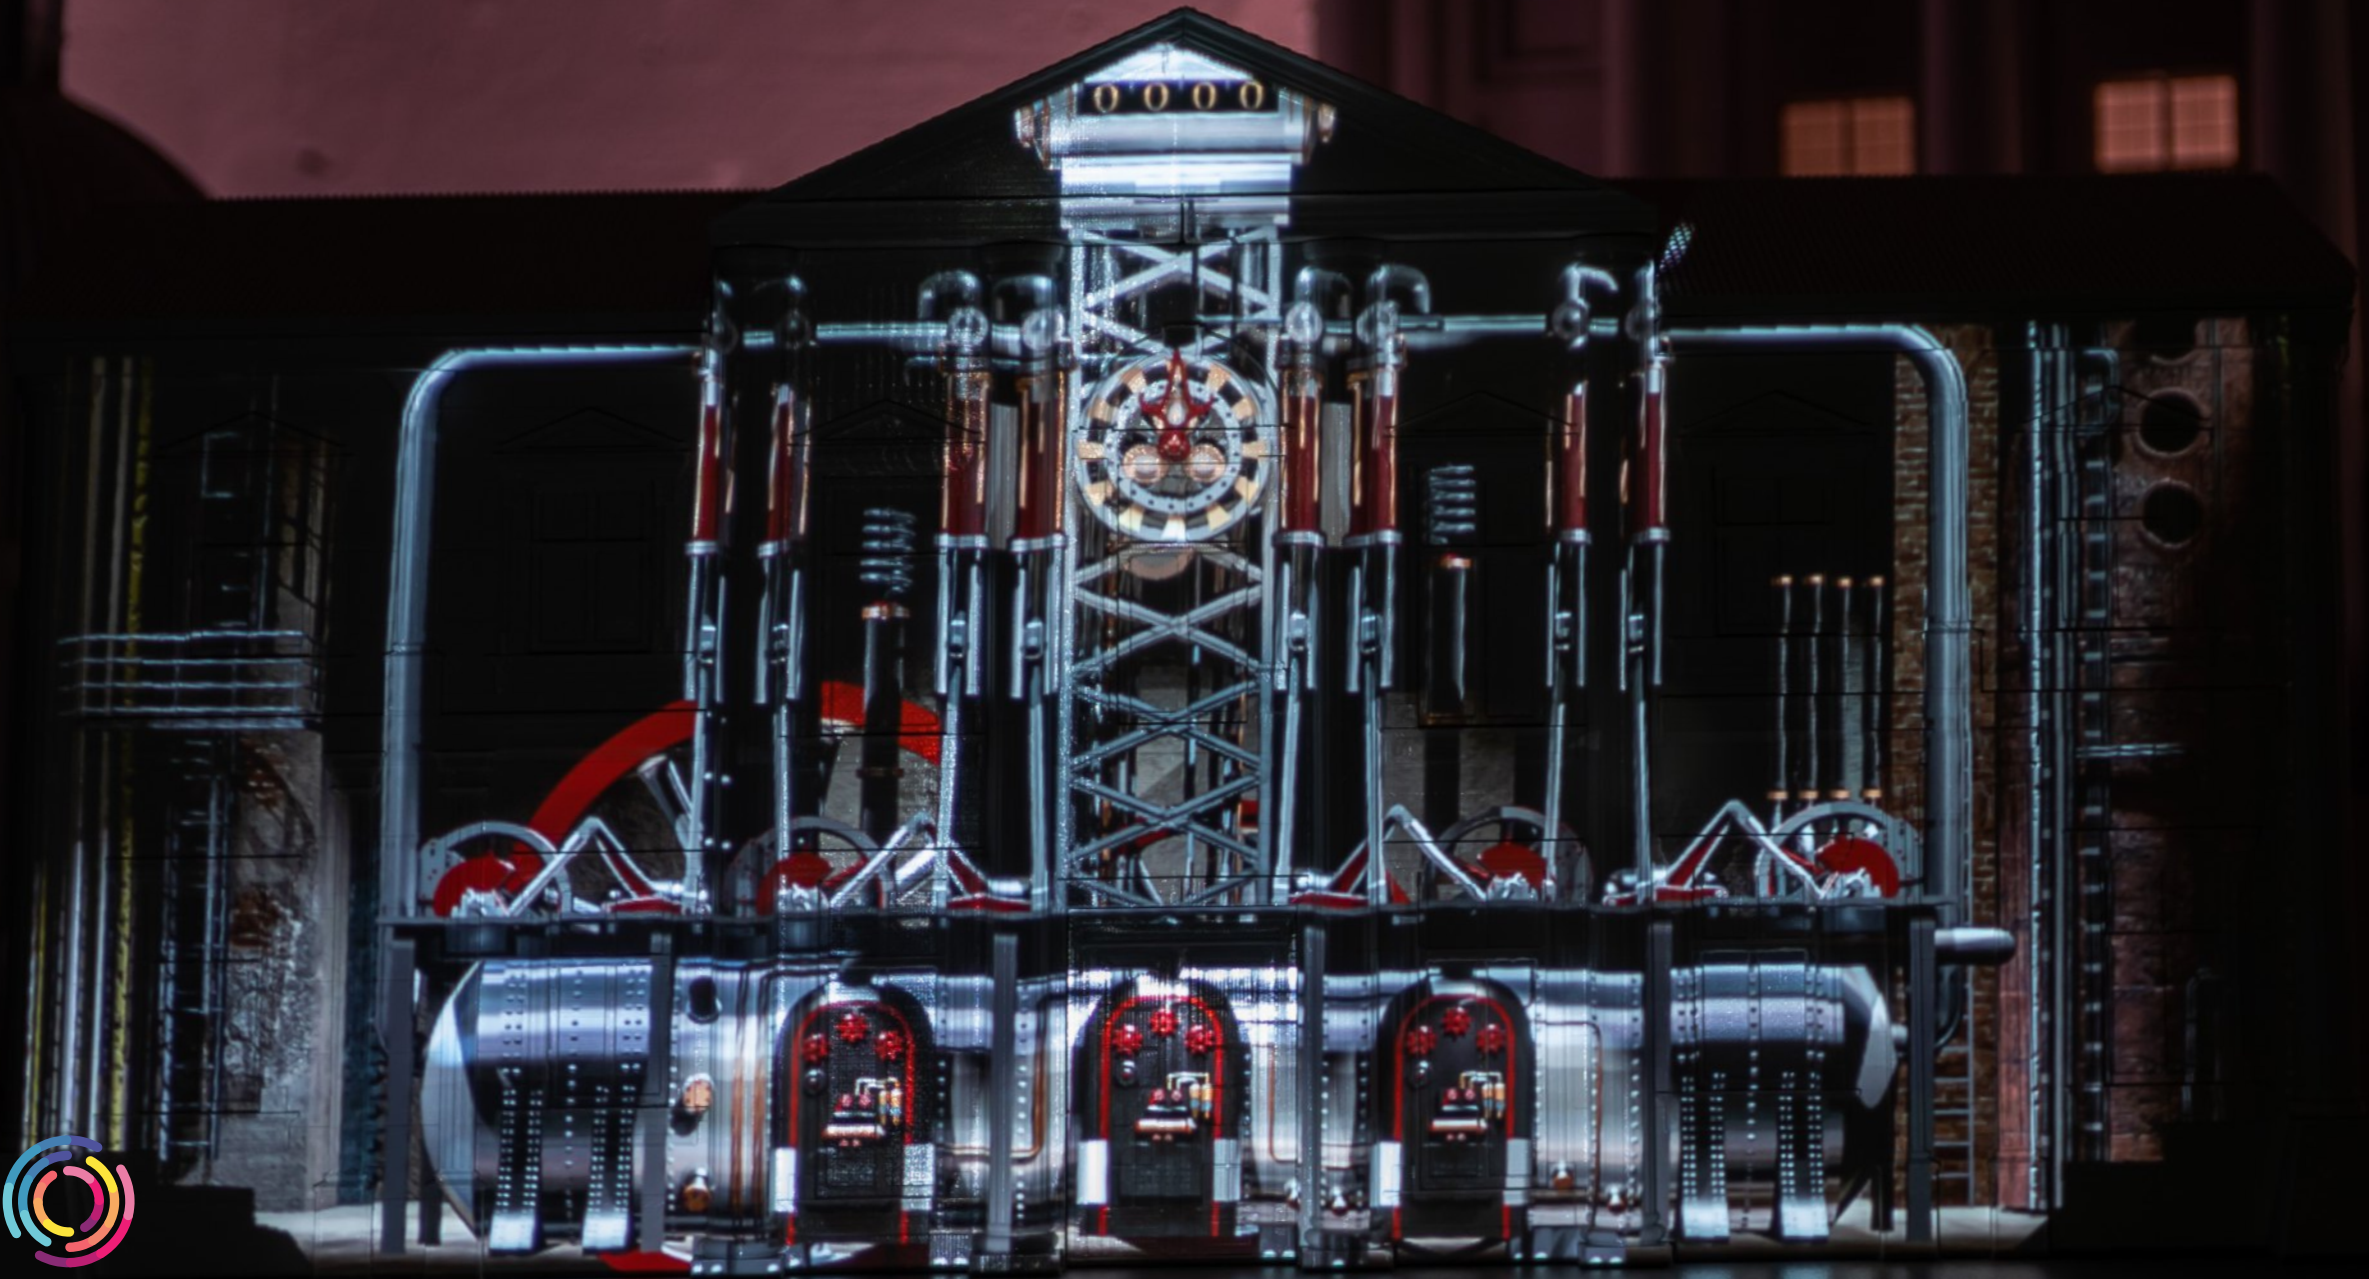

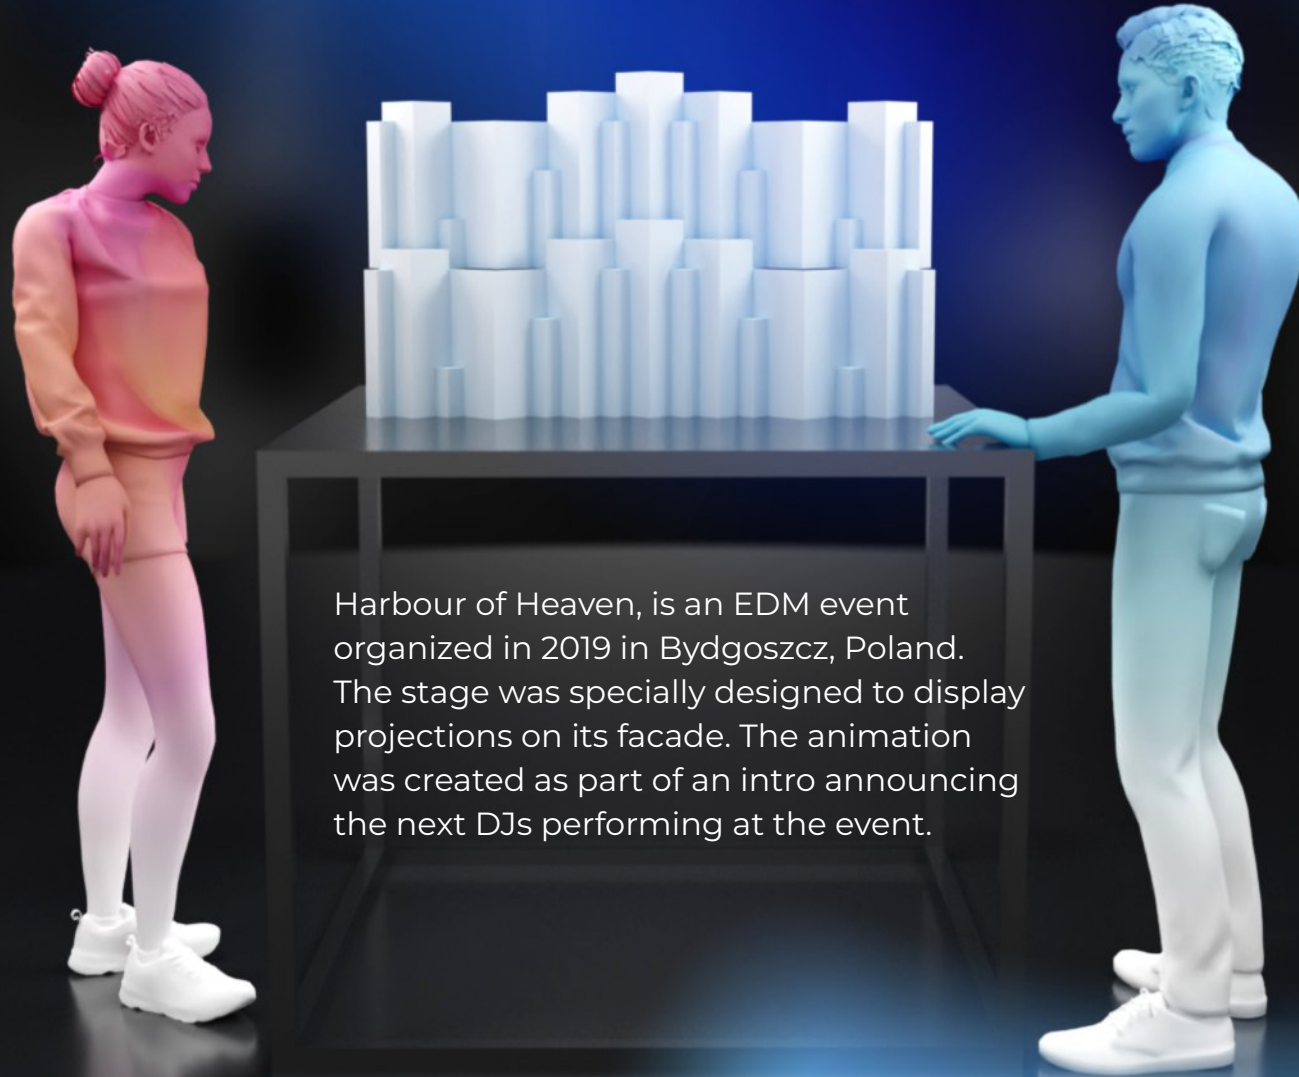

— Model - Palace in Krzycko

An artistic installation located in the premises of Visual Sensation company in Krzycko. The projection was created to visualize the offering possibilities.

— Model - Scenography Harbour of Heaven

Harbour of Heaven, is an EDM event organized in 2019 in Bydgoszcz, Poland. The stage was specially designed to display projections on its facade. The animation was created as part of an intro announcing the next DJs performing at the event.

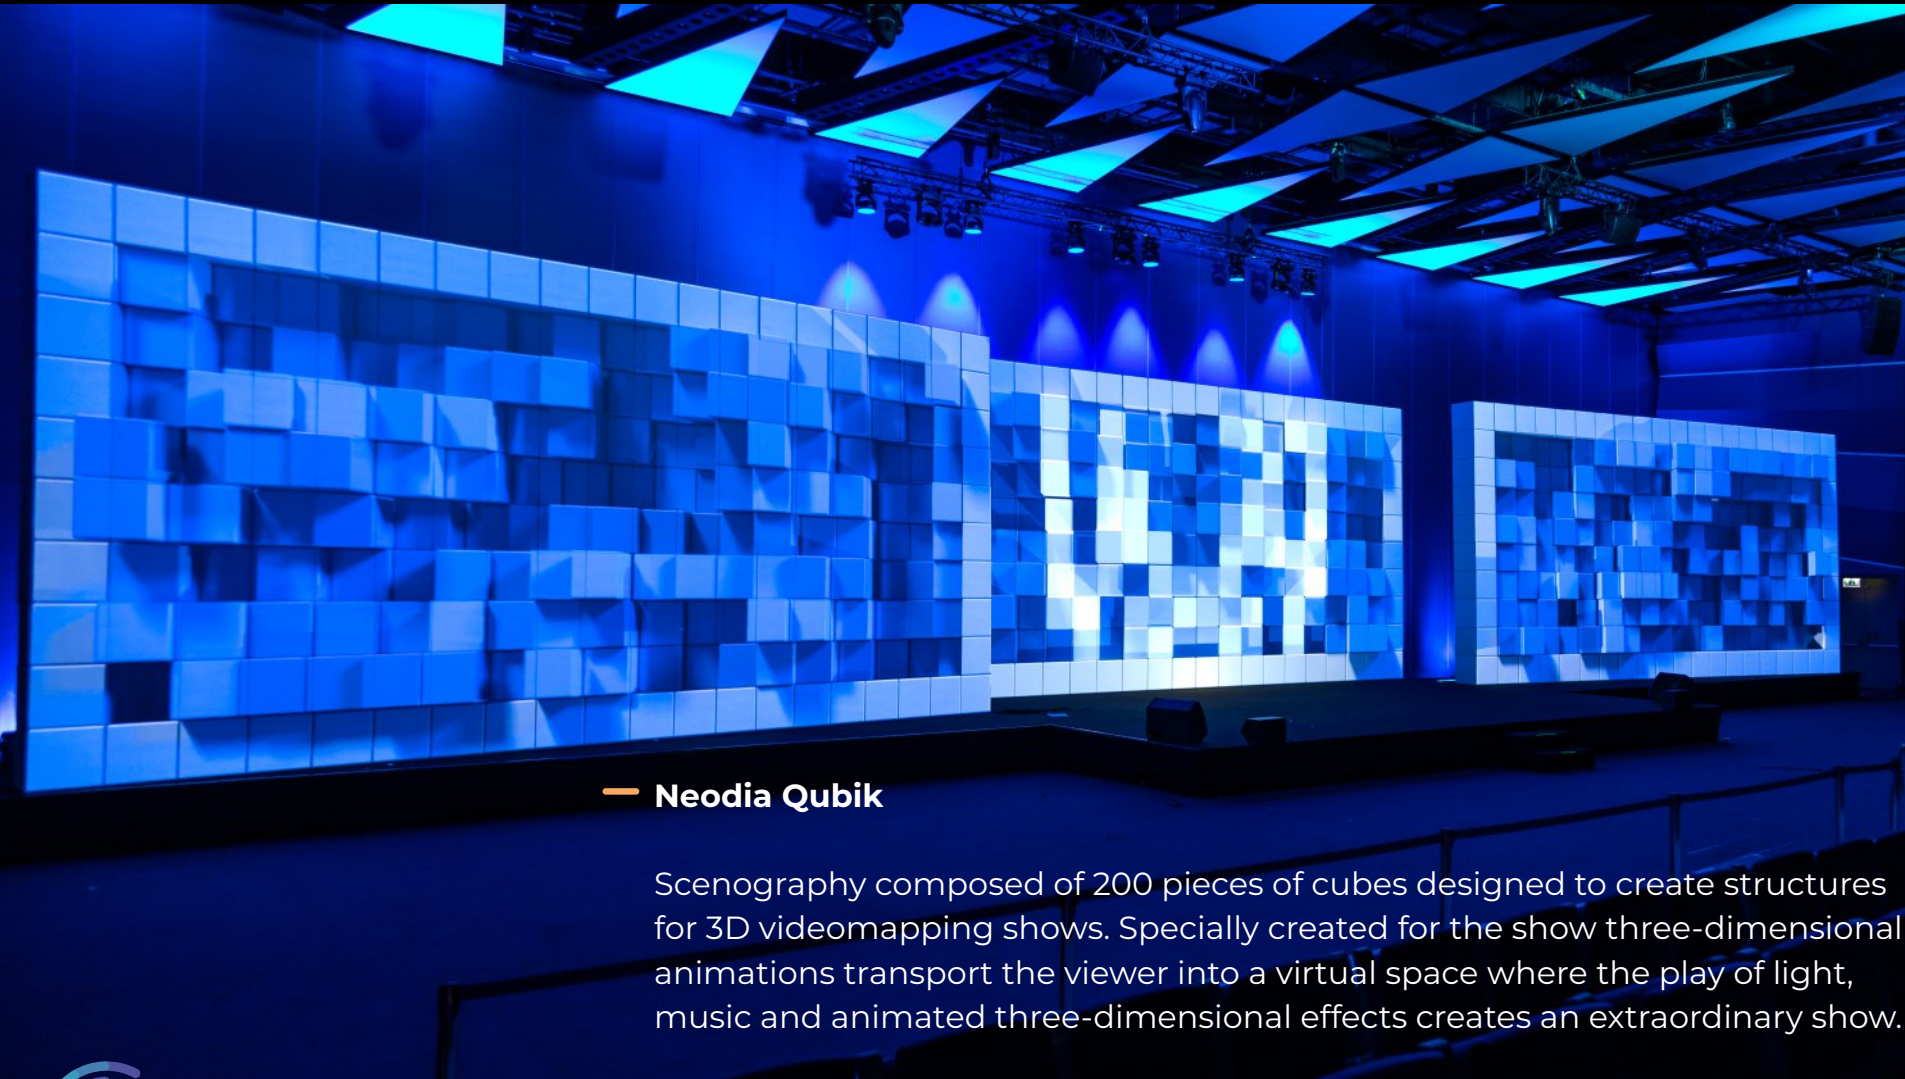

Sunrise Festival, is one of the biggest events in Europe, operating since 2003. It brings together many genres of electronic music scattered across different stages in the festival area. The design of the "White" stage was inspired by the mysterious figure of a mime. The animation was created as an intro to announce the next DJs performing on the "White Stage".

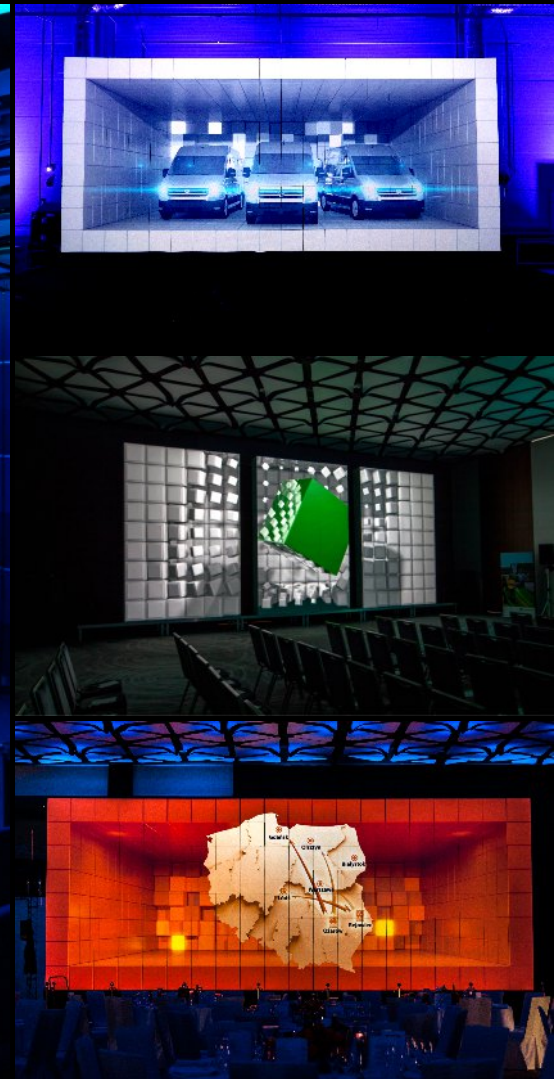

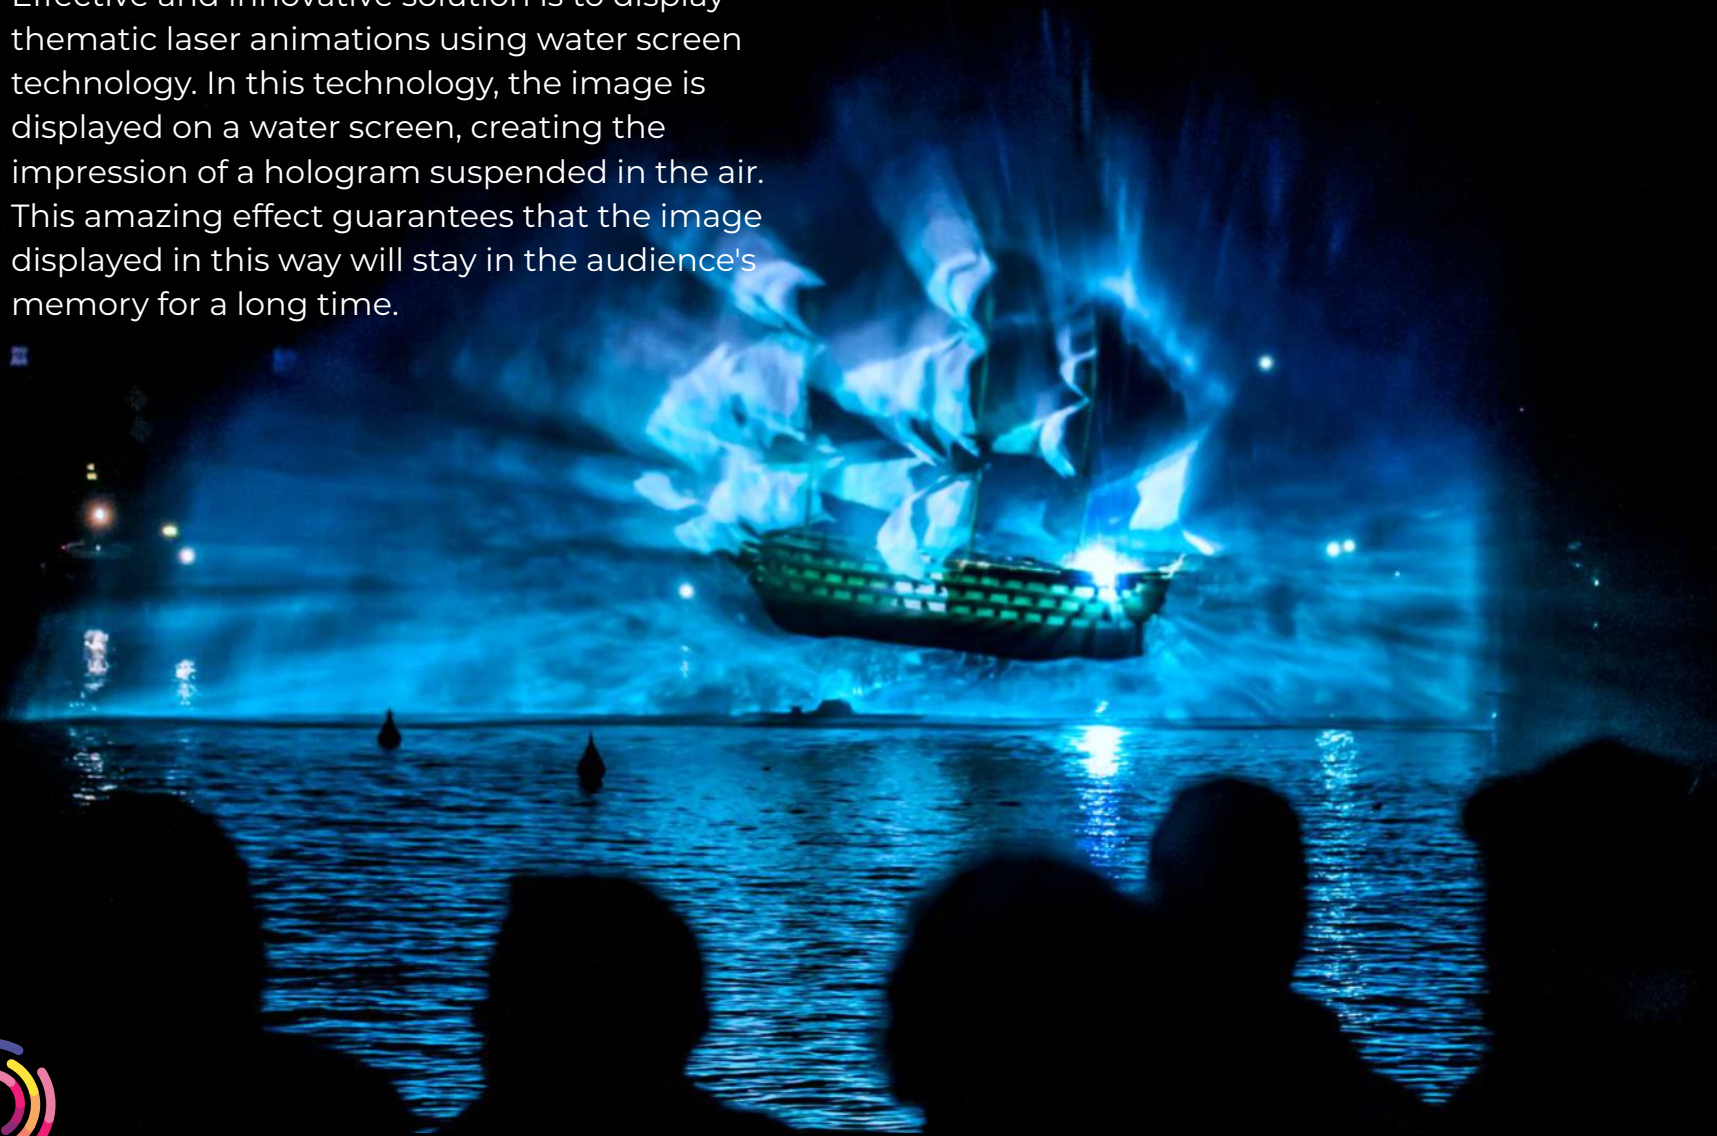

— **Neodia Qubik**

Scenography composed of 200 pieces of cubes designed to create structures for 3D videomapping shows. Specially created for the show three-dimensional animations transport the viewer into a virtual space where the play of light, music and animated three-dimensional effects creates an extraordinary show.

— Neodia Water

Effective and innovative solution is to display thematic laser animations using water screen technology. In this technology, the image is displayed on a water screen, creating the impression of a hologram suspended in the air. This amazing effect guarantees that the image displayed in this way will stay in the audience's memory for a long time.

— Neodia Water

The only mobile water fountains in Europe that burn with live fire! Water, like fire, has always fascinated man. Thick columns of water shot up to a height of 8 m, illuminated by LED lighting and burning with live fire perfectly matched to the music, with their beauty and splashing transport the viewer into a fairy-tale world. In this astonishing combination, we have matched the water with fire.

— Neodia Light

Architectural lighting of buildings and trees helps visually warm up the venue, sets a fabulous transition path between attractions.

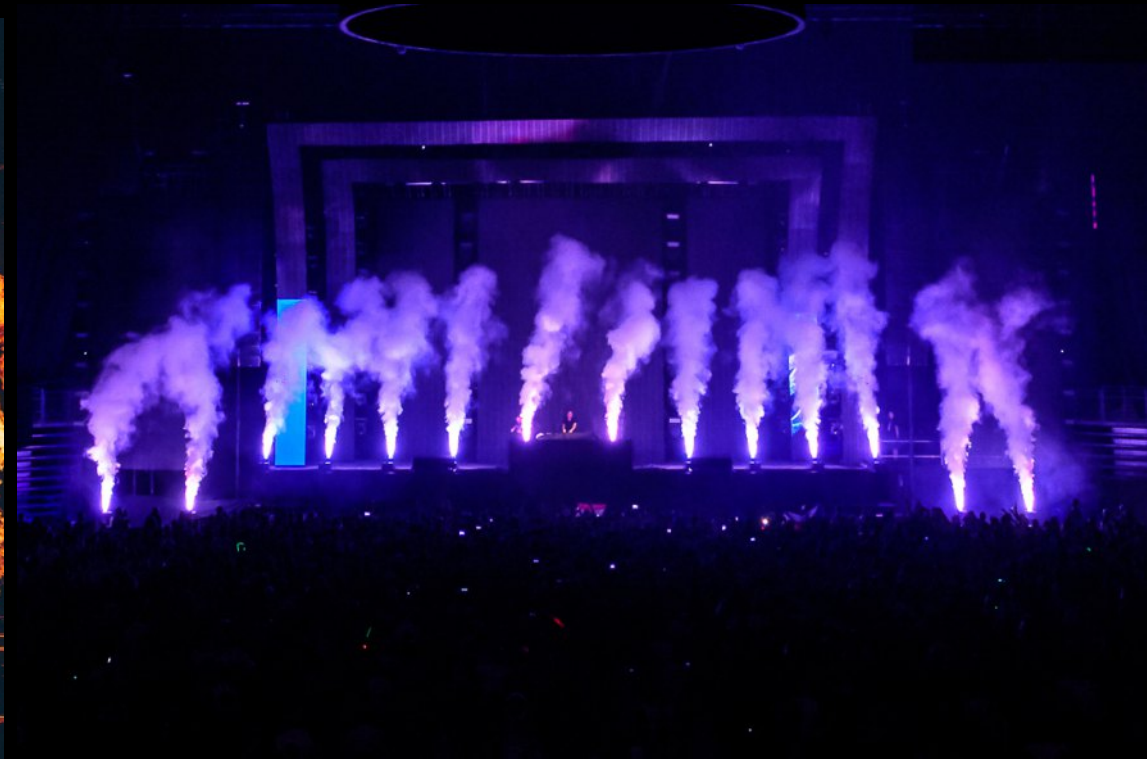

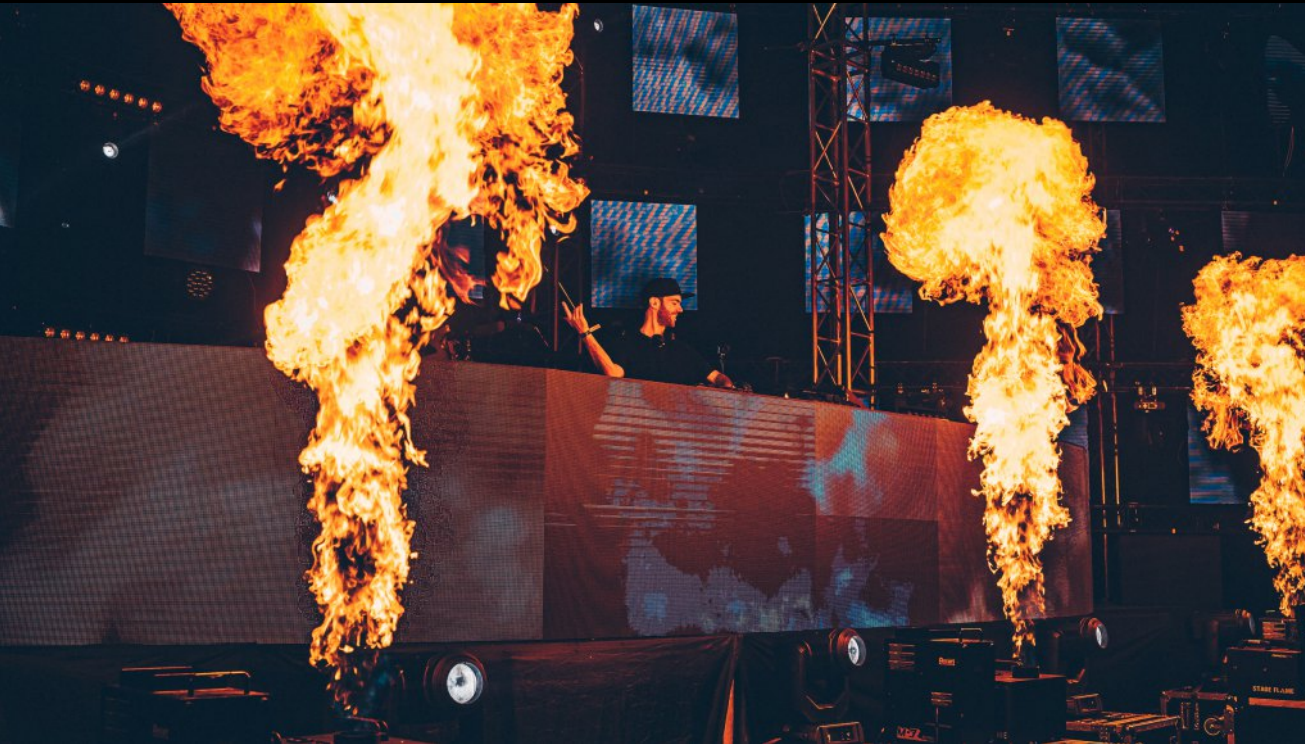

— Neodia Laser

Spatial show is a basic, very impressive part of the show. It allows the viewer to be in the center of the action providing an unforgettable experience. In this part of the show, the entire space of the place where the show is performed is filled with amazing effects, surrounding the viewer with tangible colored light. Amazing laser effects perfectly synchronized with the music always arouse delight among the audience.

— Neodia Special Effects

Bursting fires, stage pyrotechnics, CO2 smoke or laser beams perfectly enhance the laser show, accentuating the highlights of the show.
